Computer Networks
CSE 421
QUIZ 3,SET A
Time 20 min, Marks: 15

ID	Name:	Sec
----	-------	-----

1.	A network administrator identifies that your computer has an IP address of 123.221.56.13 where 9 bits of the IP are host bits. a. What's the subnet mask of the above IP block? b. Figure out the network address c. How many hosts does the above IP block support?	5
2.	You want to redesign the subnetting of your office for more efficient use of IPs. Given your computer has an IP address of 150.33.4.2 and its also mentioned that your network has a total host of 60,000 employees. Use your network address and then use VLSM to efficiently create subnetworks for host requirements of 2020, 1020, 250, 250 and a switched network which is connected to 7 routers. (you need to only find the network address of each block)	10

QUIZ 3,SET B
Time 20 min, Marks: 15

ID	Name:	Sec
----	-------	-----

1.	A network administrator identifies that your computer has an IP address of 123.221.56.13 where the subnet mask is 255.255.192.0 a. What's the prefix mask of the above IP block? b. Figure out the broadcast address c. How many hosts does the above IP block support?	5
2.	You want to redesign the subnetting of your office for more efficient use of IPs. Given your computer has an IP address of 250.133.141.2 and its also mentioned that your network has a total host of 15,000 employees. Use your network address and then use VLSM to efficiently create subnetworks for host requirements of 2020, 1020, 250, 250 and a switched network which is connected to 7 routers.(you need to only find the network address of each block)	10
