

15A	CSE421: Computer Networks Quiz #4 Time: 25 Minutes	Marks: /15
Serial:	Name:	ID:

Figures in the right margin indicate marks.

Q1	You checked your computer's IP configuration and found the following properties, Link-local IPv6 Address : fe18:413e:a11f:0000:0000:bd50:0b00:0000 IPv4 Address. : 192.168.221.103 Prefix Mask. : 23 Default Gateway : 192.168.201.1 I. Write the simplified form of the above IPv6 address. II. Calculate the subnet mask of the network. III. Calculate the broadcast address of the network. IV. Using the network address 31.13.32.0/19, efficiently calculate the subnets for 3 LANs with host requirements of 900 hosts, 126 hosts excluding the default gateway, 512 hosts; a switch network connected to 4 router interfaces and one WAN network.	2 + 2 + 2 + 9
